

# Marine driveline solutions that deliver

## HIGH SPEED CARDAN SHAFTS

Smooth, quiet & lightweight  
drivelines for:

- ❖ Waterjet
- ❖ Sternleg & Pod
- ❖ Remote gearbox

## CARDAN SHAFTS

- ⚙ Low noise – smooth operation
- ⚙ Coated splines – fine tolerance, low friction, electrical isolation between flanges
- ⚙ High power capacity with compact design
- ⚙ Maintenance free design option
- ⚙ High speed stability
- ⚙ Low operating temperatures

## SHORT COUPLED

- ⚙ Lengths from 180mm
- ⚙ Lightweight
- ⚙ Sliding spline design
- ⚙ High performance design for competition boats
- ⚙ Splined end yokes to suit waterjets

## CUSTOM DESIGN

- ⚙ Special application design shafts
- ⚙ High angle
- ⚙ Torsionally flexible
- ⚙ Machined flanges to suit gearboxes

## FLYWHEEL COUPLINGS

- ⚙ Torsionally soft flywheel to covershaft adpoter
- ⚙ Absorb engine & propulsion system vibration

## LONG SERIES

- ⚙ Long series driveshafts with support bearings allowing for extended distances between engine and propulsion system.

## BULKHEAD SEALS

- ⚙ Providing a means for cardan shafts to pass through a watertight bulkhead
